Dear Chief Matias & Toni,

On behalf of Stephen Campbell Associates, Eventide and NICE thank you for the time you spent with Richard Geremia discussing your upgrade from the current NICE System which has a 2008 NICE Operating System that is no longer supported by Microsoft as of January 2020. With this proposal we are providing two (2) options with the following benefits:

- Option 1: Upgrade to NICE Inform Professional 9 with a New Server. NICE "Core" licenses offer future expansion and flexibility by allowing you to go from traditional Analog and Digital channels to VoIP or RoIP channels at no additional charge. There is an aggressive discount to upgrade to this version which will apply until Version 9 is end-of-sale.
- Option 2: Eventide voice recorder. Eventide's Linux-based Operating System will eliminate Microsoft operating system issues and the need for continual operating system updates.

Chief & Toni - let's get on a telephone call so I can explain more fully the three options, and which one is the most advantageous to your department.

Best Regards,

Richard Geremia
